Millard Public Schools will build, own, and operate an approximately 175,000 sq. ft. facility on the 49-acre campus of Keith Lutz Horizon School, four softball/baseball fields, and supporting facilities (e.g. press boxes/restroom/concession). Additional parking will be constructed to accommodate the new facility. Millard Public Schools anticipates serving its approximately 24,000 students in curricular and extra-curricular programs.

Before school, the proposed facility is likely to be used for multiple extra-curricular activities as teams’ condition/practice. During the school day, we anticipate very little use of the facility, perhaps some things like fun and field day activities for elementary schools. After school, we would expect two to three hours of use for extra-curricular activities. Before and after school have the potential to alleviate some of the strain on our currently overtaxed indoor facilities such as gymnasiums for our extra-curricular activities.

Following our after-school use, there may be some extra-curricular activities directly related to Millard Public Schools. Applicable extra-curricular activities might include things like conditioning when the weather is poor, or when gym space at the three high schools is not available, for sports like basketball, track and field, and cross country. It is also likely to be used for full practices for activities/athletics like golf, softball, baseball, soccer, cheer, dance, band, color guard, winter guard, twirlers, lacrosse, and Jr. ROTC. However, we anticipate much of the use will be community use, much like the gyms and sports fields currently at our 35 school buildings (see Millard Public Schools Board Rule 1340.1 - https://www.mpsomaha.org/board/policies/13401-use-school-facilities-and-equipment).

Combined anticipated hours for school and community use are from approximately 5:00 a.m. to 11:00 p.m. daily, including weekends, all twelve months of the year. Summer use will also include curricular and extra-curricular programs (e.g. summer school physical education programs). In addition, there will be expected community use under Millard’s Board Policies and Rules regarding facility use.
